

Job description: Intern

Pay: Competitive

Location: Central London (EC2) with travel

Start date: Any time, minimum 8 weeks

About Oxbow Partners

We are a fast growing management consulting firm serving exclusively the insurance industry. We advise on strategy, operations and digital transformation.

The firm was set up in 2015 by a group of people who were frustrated with the traditional consulting model. We wanted to build an entrepreneurial, non-political and non-hierarchical firm that would have greater impact with our clients.

We are proud that our first project was to build a new division for Munich Re, now called [Digital Partners](#). Many of the leading European insurers and reinsurers are clients, as well as ‘challengers’.

We have developed proprietary methodology to execute projects. We call it [Agile Strategy™](#) and believe it delivers outcomes faster and at lower risk than traditional methodologies for our clients.

We are recognised as industry thought leaders. We publish an annual report called the [InsurTech Impact 25](#) and write extensively on [our popular blog](#). We regularly provide comment for the press (including Radio 4 and the FT) and speak at investment banking conferences.

Our values and culture

Our values guide everything we do and the way we behave at Oxbow Partners:

-  Strive to be the best, but humble enough to recognise there’s always much to learn
-  Be hard on facts, even when it means giving tough messages...
-  ...but soft on people
-  Imperfect impact trumps perfect analysis
-  Build the brand, and the business will build itself

We work hard but work-life balance is important to us.

Why join us?

Oxbow Partners combines the best of “big consulting” with the best of the startup world. Our clients engage us for practical advice, led by Partners who are recognised experts in the industry. Our working environment is entrepreneurial: we have no set corporate rules and pursue opportunities that interest us.

Oxbow Partners is a great place to learn about the insurance sector and top-tier consulting. You will be an important member of our business and we will make sure you are involved in a broad range of activities.

We are obsessed with empowering our staff. All employees are strongly encouraged to network extensively in the market and to pitch opportunities for the business that they can then lead. We invest heavily in our employees' careers.

The role

We are looking for an intern to support us with a number of key aspects of running the business including client projects, published firm reports on industry trends, and product research and development.

Candidate requirements

- 🕒 Completed or on trajectory for at least a 2:1 from a top university
- 🕒 Proficient in Microsoft Office especially PowerPoint and Excel
- 🕒 Strong communication skills
- 🕒 Ability quickly to understand and learn complex industries and analysis techniques
- 🕒 Comfortable working in a fast paced environment
- 🕒 Insurance industry knowledge is helpful but definitely not essential

The insurance industry

- 🕒 Everyone needs insurance, but nobody cares about it. This poses interesting challenges around distribution and product development. With the explosion of digital in our lives, insurers are innovating like never before.
- 🕒 Insurance is hugely complicated. Insurers are selling protection against a possible future adverse event, so they don't know what the cost of the product is until after they've sold it – sometimes many years after they sold it. They must be outstanding in their use of data.
- 🕒 Insurance is extremely diverse. At one end of the spectrum there is insurance for offshore oil rigs; at the other end there is motor insurance or personal life insurance. Insurers now need to work out how to provide cover against emerging trends like autonomous vehicles or 3D printing. We work across all of these topics.

How to apply

Please email careers@oxbowpartners.com with your CV and a covering email to hear more.
